Art Unit: 2681

DETAILED ACTION

1. Claims 50 is objected to because of the following informalities: in line 3, the phrase "the camera card" should be --circuit card-- to be consistent with the term in claim 49; and in line 3, the term "generatig" should be --generating--. Appropriate correction is required.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claim 50 recites the limitation "the camera card" in line 3. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

5. Claims 49 and 50 are rejected under 35 U.S.C. 102(a) as being anticipated by Parulski (WO94/14274).

Art Unit: 2681

Consider claim 49. Parulski teaches a circuit card (fig. 2A, item 20), which can be fitted to a card slot of a device for personal communication (fig. 2A, items 16 and 18), data collection and data processing, and comprising:

optics built in the circuit card for obtaining image information (fig. 3, item 33; p. 9, lines 1-37) ;

an image sensor in the circuit card for obtaining image information (fig. 3, item 42; p. 9, lines 1-37);

an image processing unit in the circuit card (fig. 3, item 46; p. 10, lines 1-37) ;

a memory unit in the image processing unit for storing obtained image information, and a processor unit in the image processing unit for storing obtained image information (p. 13, lines 15-26).

Consider claim 50. Parulski further teaches means for performing a character recognition task on an image obtained by the circuit card for generating a set of recognized characters (i.e., the pixel values stored in the computer 10, p. 11, lines 1-38).

Allowable Subject Matter

6. Claims 1, 4-48 are allowed over the prior art of record.

Art Unit: 2681

Response to Arguments

7. Applicant's arguments filed 7/31/2000 have been fully considered but they are not persuasive.

“Claim 49 defines a device similar to that of claim 8 but in this embodiment the components of the camera, i.e., the various parts, are integrated within the card. The defined features of these embodiments are not taught by PARULSKI...” (pp. 21-22 of the applicants’ argument).

In response to the argument, the examiner disagrees with the applicants’ argument because Parulski clearly teaches the claimed limitations as disclosed in above paragraph.

Conclusion

8. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for response to this final action is set to expire **THREE MONTHS** from the date of this action. In the event a first response is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event will the statutory period for response expire later than **SIX MONTHS** from the date of this final action.
